INTRAOCCULAR LENSES
WITH BLUE LIGHT FILTER

BRILLIANT VISION
FOR DEMANDING EYES

DEAR PATIENT,

Do you lead an active lifestyle and find your glasses bothersome? Are you suffering from cataracts, early presbyopia and/or astigmatism?

The ACUNEX® VARIOMAX / VARIOMAX Toric could be YOUR solution for such problems

The ACUNEX® VARIOMAX and VARIOMAX Toric are premium intraocular lenses (IOLs) that treat both cataracts and presbyopia. The VarioMax Toric additionally corrects astigmatism. Both lenses are individually tailored to patients' vision requirements and aim for high spectacle independence at all distances. They offer a solution for enhanced visual comfort, especially for active individuals and professions requiring frequent raising and lowering of gaze. The constant switching between different pairs of glasses could become a thing of the past.

A solution for enhanced quality of life!

(For better readability, we use the masculine form in our writing. Our statements naturally address both female and male physicians and patients.)

THE SOLUTION - EVEN FOR REFRACTIVE ERRORS!

Presbyopia is the age-related loss of the eye's ability to focus on near objects, occurring from around age 45 and often requiring reading glasses.

BRILLIANT VISION ACROSS ALL DISTANCES

Astigmatism means that the cornea is irregularly curved, which affects vision at all distances. Both lenses offer enhanced flexibility by correcting cataracts, presbyopia and/or astigmatism.
