

ACUNEX<sup>®</sup>  
QUANTUM

INTRAOCCULAR LENSES  
WITH BLUE LIGHT FILTER

THE BETTER  
STANDARD IOL

## DEAR PATIENT,

is cataract clouding your vision?

The only successful treatment option is a minor surgical procedure in which the natural lens is removed and replaced with an artificial intraocular lens (IOL).

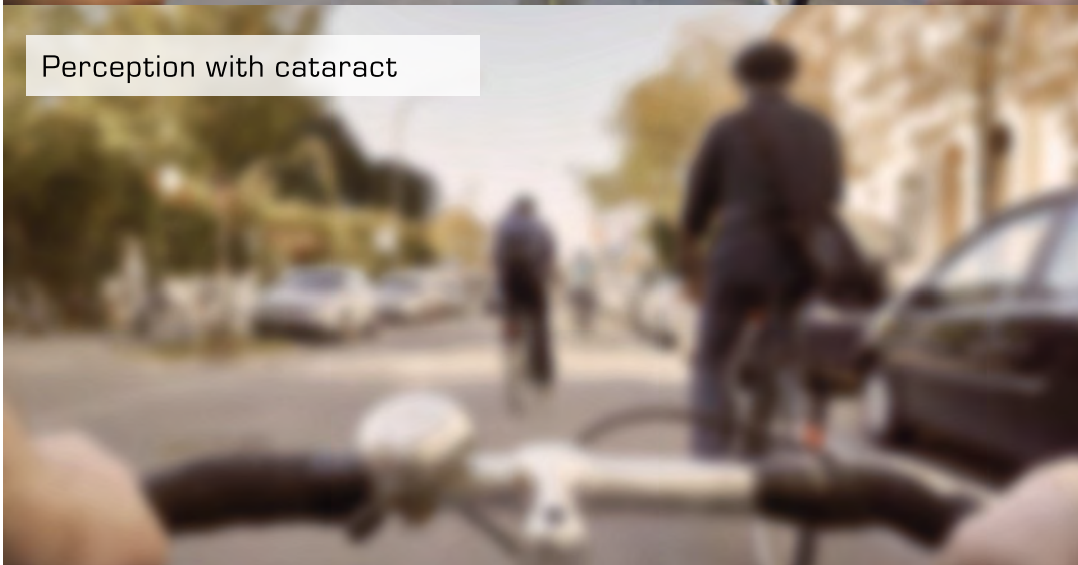

Would you like to optimize your visual performance?

Then the ACUNEX<sup>®</sup> Quantum is the right choice.

Sharp and high contrast vision

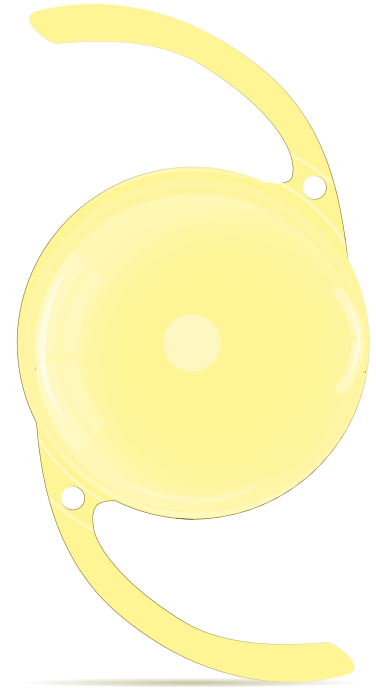

Perception with cataract

# FOR BETTER VISION UP TO THE INTERMEDIATE RANGE

The ACUNEX® Quantum is an enhanced monofocal lens. It will give you better visual comfort than a standard monofocal lens.

The lens ensures high contrast vision comparable with a conventional monofocal IOL.

However, it is not the best possible solution for those who wish to be less dependent from wearing glasses. Implantation of standard lenses is of course a suitable cataract treatment for those who do not mind wearing glasses after surgery.

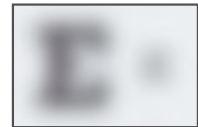

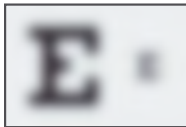

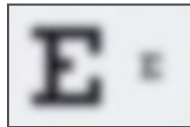

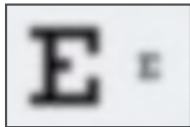

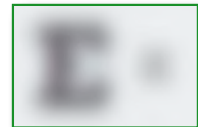

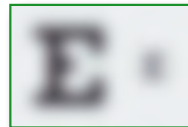

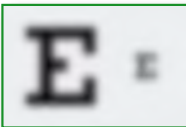

**Far distance**  
from 200 cm

**Intermediate distance**  
60 - 200 cm

**Near distance**  
up to 60 cm

Intermediate distance  
60 - 200 cm

Near distance  
 $\leq 60$  cm

## ADVANTAGES AT A GLANCE

- High independence from distance glasses
- For optimal vision in the intermediate range, varifocals or computer glasses maybe necessary
- Reading glasses will be needed for near vision
